United Nations Global Compact- Environment Principles

Principle 7

Business should support a precautionary approach to environmental challenges;

Principle 8

Business should undertake initiatives to promote greater environmental responsibility; and

Principle 9

Business should encourage the development and diffusion of Environmentally friendly technologies

Implementation

Protecting and preserving our natural environment and ensuring environmental sustainability in our corporate practices is a priority goal for us.

For the Oceans

Each year, pollutants, including plastic bags and PET bottles, are the principal cause for the deaths of hundreds of endangered marine species including turtles and sharks – which are protected by law. Plastic, furthermore, gets strewn up on our beaches, caught up on delicate corals jeopardizing the health of the entire reef system,

and in turn affecting our food supply and the wellbeing of our communities. As a way of addressing this problem we carried out “For The Oceans” awareness campaign in collaboration with Parley Maldives - encouraging all staff and public to use reusable bags and to reduce single use plastic bags.

We also instituted a company-wide initiative to eliminate the use of single use plastic water bottles and have supplied all our staff with BPA free multi-use water bottles & reusable shopping bags.

Renewable Energy

For a climate vulnerable country such as ours, burning fossil fuels is not a sustainable long term solution. While renewable energies are yet to achieve the same economies of scale as more traditional sources of energy, we are committed to low emission carbon-resilient business practices. This is why we seek to reduce our carbon footprint through increasingly relying on renewable energy to power our various systems. We are a long way off from completely weaning off fossil fuels, yet we take great pride in our role as one the largest producers and users of renewable energy in the country.

In the past year, we have initiated a project to install additional solar panels in our equipment sites where we use renewable energy as a secondary source of power. It is estimated that the additional solar panel installations would produce 219,000 KWh of renewable energy every year, which would result in an approximated reduction of 153 metric tons of CO2 emitted.

Energy Efficiency

The sustainable green design features incorporated in Dhiraagu Head Office leads to significant energy consumption efficiencies.

☑ All the lights used in the building, including emergency lights are 99% LED lights

☑ Motion detectors/sensors are used to switch off the lights in common areas of the building such as corridors, staircases, toilet areas etc, to ensure lights are switched off when not in use.

☑ High heat reflective glass is used in building facade to minimise heat entering into the building

☑ Ozone friendly refrigerant R410A is used in the VRV AC units installed in the building.

☑ Air conditioning is set at a minimum 25 degree Celsius in all main office areas. The office adopts central AC control, where air-conditioning is centrally turned off at pre-set times and is limited to official working hours.

World Environment Day

We collaborated with the Civil Service Commission to support the Aaro Tree Planting programme, in the newly reclaimed land of Hulhumale'.

Measurement of Outcomes

☑ The energy saving features incorporated in Dhiraagu Head Office resulted in an annual reduction of approximately 390,228.00 kwh of electricity, which is also equivalent to 276 metric tonnes of Carbon Dioxide or 636 barrels of oil.

United Nations Global Compact- Anti-Corruption Principles

Principle 10

Business should work against corruption in all its forms, including extortion and bribery

Policy and Goals

Dhiraagu's Anti-Bribery Policy comprehensively addresses in detail with regard to the following;

❑ We do not tolerate bribery, and do not offer , give or receive bribes or improper payments or participate in any kind of corrupt activity, either directly or through a third party.

❑ We do not make facilitation payments and we do not allow others who work for us to make them either.

❑ Any gifts or hospitality or promotional expenditure we receive or give in connection with our business should

always be proportionate and reasonable in terms of value and frequency. Gifts and hospitality should never be offered or accepted if it may be perceived as improperly influencing a business decision about or by us or impair independence or judgment about us.

❑ We do not make political contributions either directly or indirectly to political parties, causes or individuals

❑ We are committed to ensure that those who act on our behalf as representatives, agents, consultants and other providers of services do not bribe on our behalf.

Implementation

Supplier Code of Conduct

From 2013 onwards, it was made mandatory for all our suppliers to sign the Supplier Code of conduct when entering into a contract with us. This code of conduct addresses the commitment to comply with applicable laws and regulations concerning bribery, corruption, fraud, and any other prohibited business practices.
